Nature

The privately owned Sanlan RV & Golf Resort is famous for its natural beauty, which rivals many of the state parks. Both the Sanlan RV Park and the Sanlan Golf Course are part of the Sanlan Bird & Wildlife Sanctuary, so you can tee off surrounded by the natural beauty of Florida. The area covers nearly 600 acres of wooded land, mined for phosphate in the 1930s and 40s.

This mining history has been left far behind, revealing very fertile land in place of the mining-scarred landscape. In the late 1960's, miles of hiking trails were constructed by flattening the tops of the ridges left behind from the mining process. Over time, the slopes of these ridges have been taken over by trees, providing natural shading for most of our trails.

The property is bounded on the south by Banana Lake, home to many water birds. Bald eagles nest nearby, and ospreys frequently drop in for fishing in Banana Lake. Bird lovers are sure to love this area, which is included annually in the Audubon Christmas Bird Count. Alligators and otters are frequently seen in our lakes and ponds as well as other animals including bobcats and raccoons. Our commitment to help wildlife is our way of giving back to nature, which makes us more than just an RV park.

Sanlan Golf

Three distinct 9-hole courses are available for your enjoyment. Each course offers fairways ranging from narrow to wide with several doglegs, water hazards, sand traps, and other surprises that make the courses both challenging and fun to play. Changes in elevation combined with natural features such as trees and wetlands provide golfers unlimited opportunities to test their skills. The course is complimented by a large practice putting green and natural turf driving range.
